

ERGONOMIC RISK FACTORS FOR CARPAL
TUNNEL SYNDROME SYMPTOMS AMONG
NURSES AT HOSPITAL IN MELAKA

SITI NOR MIRSA BINTI AMIRUDDIN

BACHELOR OF OCCUPATIONAL SAFETY
AND HEALTH WITH HONS

UNIVERSITI MALAYSIA PAHANG

ERGONOMIC RISK FACTORS FOR
CARPAL TUNNEL SYNDROME SYMPTOMS
AMONG NURSES AT HOSPITAL
IN MELAKA

SITI NOR MIRSA BINTI AMIRUDDIN

Report submitted in fulfillment of the requirements
for the award of the degree of Occupation Safety and Health with Honors

Faculty of Engineering Technology
UNIVERSITI MALAYSIA PAHANG

JANUARY 2018

SUPERVISOR'S DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the degree of Occupational Safety and Health with Honours

Full name : NURLIYANA BINTI MOH HUSIN

Position : SUPERVISOR

Date : JANUARY 2018

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is based on my original work except quotations and citations which have been duly acknowledge. I also declare that it has not been previously or concurrently submitted for any other degree at Universiti Malaysia Pahang or any other institutions.

Full name : SITI NOR MIRSA BINTI AMIRUDDIN

ID Number : PA14013

Date : JANUARY 2018

ACKNOWLEDGEMENTS

I am truly grateful and would like to express my sincere gratitude to my supervisor, Miss Nurliyana Binti Moh Husin for her constant guidance and support in making this research possible. She had always believed in me despite many flaws I showed throughout the whole research process. She had relentlessly helped me improve not only my thesis, but also myself as a whole with her passion and care. Her encouragement has given me strength and willpower to keep pushing myself in completing this research. I am truly thankful and honoured to be given such golden opportunity to be guided by her.

Next, my utmost thanks goes to my beloved parents, Mr Amiruddin Bin Haji Omar and Mrs Sarah Binti Md. Ali for their over flowing support and always there whenever I felt down and stress. Without their love and sacrifices, I would not be here today. Their constant prayers and believed in me kept me strong especially at times when I felt it difficult for me to go on. They are my pillars of strength and without their constant support, I would not be able to complete this research on time. Not to forget my other beloved siblings, Siti Nor Amira Binti Amiruddin, Muhammad Amirul Syafiq Binti Amiruddin, Siti Nor Mirsarah Binti Amiruddin and Siti Nor Syafiq Amira Binti Amiruddin who always cheer me up whenever I feel sad.

Other than that, I am grateful to my beloved classmates, Nurazzwa Binti Omar and Azreen Razwany Binti A. Razak, Norfarhana Azliya Binti Ahmad Razali who always listened and helped me with my problem and never – ending concerned regarding on my Final Year Project. I am thankful to have all of you by my side as you kept showering me with motivation and endless support during my research.

In addition, I would like to thanks to all nurse that works in Surgery Department of Hospital Melaka that willingly participate as my respondents and the Surgery Department for allowing me to do the data collection in order to complete this research Your contribution of effort and time were highly appreciated. Last but not least, I would like to thank everyone whom had contributed either directly or indirectly throughout the process of this research. I am sincerely thanks all of you from the bottom of my heart.

CHAPTER 1

INTRODUCTION

1.1	Introduction	1
1.2	Problem statement	3
1.3	Research Objective	4
	1.3.1 Specific Objective	4
1.4	Research Questions	4
1.5	Research hypothesis	5
1.6	Scope of study	5
1.7	Significant of Study	5
1.8	Conceptual Framework	7
1.9	Operational Definition	8

CHAPTER 2

LITERATURE REVIEW

2.1	Introduction	10
2.2	Definition of Carpal Tunnel Syndrome (CTS)	10
2.3	Symptom of Carpal Tunnel Syndrome	12
2.4	Factor of Carpal Tunnel Syndrome	12
	2.4.1 Individual Risk Factors	12

	2.4.2	Ergonomic Risk Factors	13
2.5		Test and Diagnosis of Carpal Tunnel Syndrome	15
	2.5.1	Clinical Test	16
	2.5.2	Physiological Assessment	17
	2.5.3	CTS Specific Tools	18
2.6		Treatment of Carpal Tunnel Syndrome	21
	2.6.1	Nonsurgical Therapy	21
	2.6.2	Surgery therapy	22
2.7		Type of Nurses	23
	2.7.1	Registered Nurses	23
	2.7.2	Community Nurses	23
	2.7.3	Assistant Nurses	24
	2.7.4	Midwife	24
2.8		Relation of CTS among Nurses	25

CHAPTER 3

METHODOLOGY

3.1		Introduction	26
3.2		Design of Study	26
3.3		Location of study	28
3.4		Population of Study	29
3.5		Sampling	29
	3.5.1	Sample of Study	29
	3.5.2	Exclusion Criteria	30
3.6		Sample Technique	30
3.7		Data Collection Technique	31
	3.7.1	Survey	31
	3.7.2	Observation	31
3.8		Instrumentation of Study	32
	3.8.1	Questionnaire	32
	3.8.2	Checklist of Ergonomic Risk Factors Assessment	33
3.9		Data Analysis	33
	3.9.1	Descriptive Analysis	33

3.9.2	Spearman Correlation	34
CHAPTER 4	RESULT AND DISCUSSION	
4.1	Introduction	35
4.2	Ergonomic Risk Assessment	35
4.2.1	Awkward Posture	36
4.2.2	Static and Sustained Work Posture	36
4.2.3	Forceful Exertion	37
4.2.4	Repetitive Motion	37
4.3	Descriptive Analysis	38
4.3.1	Symptom Severity Scale	38
4.3.2	Functional Status Scale	38
4.4	Normality Test	39
4.5	Demographic Information	40
4.5.1	Gender	41
4.5.2	Age	42
4.5.3	Race	43
4.5.4	Educational Level	44
4.5.5	Service Duration	45
4.5.6	Medical History	46
4.6	Relationship between the Individual factors and Prevalence of Having CTS	47
CHAPTER 5	CONCLUSION ANDRECOMMENDATION	
5.1	Introduction	56
5.2	Conclusion	56
5.3	Recommendation	57
5.3.1	Recommendation Based on Study	57
5.3.2	Future Researcher	58
5.4	Limitation of Study	59
